

Social Risk is Gifting's Real Cost

Why Gifting is Hard

- 87% spend 30+ mins choosing a gift — yet still feel uncertain at the end
- When stuck, people ask someone else or just browse for hours — no tool helps
- 52% spend more than 1 hour on a single gift decision

3 Hard Stats

3.5/5

Avg gifting stress

52%

Regretted a gift

42%

Top fear: "Will they like it?"

Problem Statement

Gifting is not a product discovery problem — it's a confidence problem. People don't struggle to find gifts; they struggle to feel sure the gift is right for this specific person.

Problem Vision

From endless options to one thoughtful choice.

6 Tools Try to Solve Gifting — All Miss the Same Gap

Competitor Analysis Table

Tool	What it does	Where it fails
	Surfaces popular gifts by category	Popularity ≠ thoughtfulness; zero personal context
	Cash + sentiment gift card hybrid	Checkout friction; no real merchant involved
	Visual inspiration boards	No purchase path; no decision support
	Secret Santa wishlist organiser	Recipient must fill wishlist — kills surprise
	Real people suggest ideas	Slow, no structure, quality is luck
	AI-generated gift ideas	Hallucinated products; no Indian context

The Missing Layer

The Gap: No Tool Connects Context → Curation → Confidence

Problem Framing Canvas

What is the true problem?

Gifting is not a product discovery problem.

It's a decision problem.

People don't struggle to find gifts, they struggle to feel sure the gift is right for this specific person.

Who are the customers facing the problem?

Indian college students & young professionals (18-26 yrs) who gift colleagues, acquaintances & relatives they don't know deeply enough.

Highest stress: gifting people outside their close circle.

How do we know it is a real problem?

- 52% have regretted a gift they gave
- 3.5/5 avg gifting stress score
- 42% fear "Will they like it?"
- 5 out of 5 interviewees said: confidence = prior knowledge of the person

What is the value generated?

For the customer

From endless options → one confident choice in under 5 mins.

No more cart abandonment. No more gift regret.

For the business

Affiliate revenue Day 1

(Amazon/Flipkart). V2:

Confidence Pack subscription.

V3: B2B API for gifting platforms.

Why should we solve this problem now?

- LLM APIs now cheap enough for personalised gift reasoning
- Indian e-commerce affiliate ecosystem fully matured
- Gen Z gifting budgets rising — no product built natively for their emotional relationship with gifting

The Data Backs It Up - User Insights

2-min anonymous survey · 31 respondents · 18–25 year olds - students & young professionals across India — all bought at least one gift in the past year.

How They Shop?

35% buy gifts 3–5x a year. 30% buy 6–10x. That's not occasional - gifting is a recurring life event. Most start on Amazon or Instagram. Almost none feel confident after browsing. 90% spend 30+ min and still second-guess their final pick.

What Stresses them out?

Two worries dominated equally:

“ Will they actually like this? ”

“ Does this feel thoughtful or just generic? ”

These aren't product problems. They're confidence problems. No amount of scrolling on Amazon solves them.

What do they actually want?

When asked what feature would help most:

41% → A guided Q&A that narrows down options

39% → Personality-based gift type suggestions

7% → An explanation of why a gift would be meaningful

Combined: 87% want context-driven guidance. 0% asked for a bigger catalogue.

People don't run out of options. They run out of confidence

Survey 

The User Personas

Not Everyone Overthinks. But Everyone Gets Stuck. Across 5 interviews and 31 survey responses, 3 distinct gifting behaviours emerged — all breaking down at one point: the moment they didn't know the person well enough.

The Overthinker

Name - *Shreya*, Masters in Psychology, IEHE Bhopal, Age 22

Profile - Thoughtful, image-conscious, wants the gift to feel personal.

Behaviour - Plans early, browses a lot, abandons carts, second-guesses.

Trigger - Gets stressed when gifting someone she doesn't know well.

What confidence means - This gift says I know you.

Core Sentiment - “Gift random nahi lagna chahiye — effort dikhna chahiye“

The Last-Minute Gifter

Name - *Rohan*, College student, Age 21

Profile - Life moves fast. Gifting sits at the bottom of the to-do list until the night before forces a decision.

Behaviour - Decides 1-2 days before. Defaults to Amazon, gift card, or cash.

Trigger - Deadline + fear = paralysis, then delay.

What confidence means - Bas jaldi se right choice mil jaye.

Core Sentiment - “Gut feeling se hi le leta hoon.”

The Safe Player

Name - *Divyansh*, Masters in Cyber Security, B.A.U., Age: 25

Profile - Practical, low-risk, prefers safe choices over bold ones.

Behaviour - Doesn't browse much; thinks first, then buys. Avoids unnecessary risk..

Trigger - Gets stuck when he doesn't know the person well enough.

What confidence means - “Agar insaan samajh aa gaya, gift easy ho jaata hai.”

Core Sentiment - “Safe hona chahiye, but thoughtful bhi.“

The Job To Be Done: “When I need to gift someone and I'm not confident —help me feel like I already know them well enough to choose.” - GiftRight is built to do exactly this.

Survey 

Interviews 

5 Hypotheses Stress-Tested Against Real Users

Hypothesis	Key Evidence	Verdict & Quote
H1- Storytelling Gap	4/5 best gifts were non-material or personal. Focus on WHY vs. WHAT.	 STRONGLY CONFIRMED <i>“Best gift woh tha jo maine khud banaya tha” — Divyansh M.</i>
H2 - Confidence Gap	5/5 said confidence = knowing person deeply. Survey confidence: 3.7/5.	 CONFIRMED <i>“Gift mere baare mein bhi kuch kehta hai.” — Shreya Pandey</i>
H3 - AI Emotional Gap	ChatGPT users noted a lack of personal touch in emotional performance.	 CONFIRMED <i>Personal touch chahiye tha - woh nahi mila.” — Kishan Naidu</i>
H4 - Curation Fatigue	40% prefer guided Q&A over endless browsing options.	 CONFIRMED <i>“Bata reasons ke saath — yeh sahi kyun hai.” — Prayas Gupta</i>
H5 - Social Visibility	High IG visibility (4/5) but low group pooling interest than assumed.	 PARTIALLY CONFIRMED <i>Instagram focus verified; group UPI interest is weaker.</i>

All 4 core hypotheses confirmed independently across 5 interviews + 31 survey responses. This is not a guess — this is what GiftRight is built on.

How *GiftRight* Works — Context → Curation → Confidence

1 Tell us who you're gifting.
Relationship • Age
• Occasion Budget
• Personality Tags

2 AI maps personality →
6–8 gift directions
Powered by Groq (LLaMA 3)
Directions only, not Products.
Fast inference, zero
hallucinated links.

3 See WHY it fits
them — in your own
words.
Confidence layer
anchored in specific
user inputs.
Confidence Layer

4 Pick from 3
products. Buy with 1-
click.
Amazon / Flipkart /
Etsy. Done in under 5
minutes.

This is not a search engine. It's a
decision engine.
Context → Curation →
Confidence — in under 5 minutes.

What the User Sees — 6 Screens, One Confident Decision

Trigger
Occasion 2-5 days away. Opens GiftRight instead of Amazon

Context Input
Selects relationship, occasion, age, budget + 2-3 personality tags.

AI Curation
Sees 6 gift direction cards. Picks the one that feels right.

Confidence Layer
Reads "Why this fits (Name)" — anchored in their own inputs

Decision & Exit
Taps Buy. Shares WhatsApp split-cost message. Feels done.

The user doesn't leave with a product. They leave with a reason.

How GiftRight Makes Money — and How We'll Know It's Working

Revenue Model

 **Affiliate Commission** Day 1 · MVP

User taps Buy → Amazon/Flipkart/Etsy purchase GiftRight earns 4-8% per completed transaction. Zero payment infra.

 **Confidence Pack Subscription**
V2 ~~₹299~~ - ₹199/month — unlimited sessions Narrative Engine, saved recipient profiles, priority directions.

 **UPI Group Pooling Fee** V3
1-2% platform fee on pooled gift amounts
Built into Screen 6 WhatsApp share flow for group gifting.

 **B2B Corporate Gifting API** V3
SaaS API for companies — Diwali, onboarding kits ₹X per 1000 queries. TAM » B2C segment.

Success Metrics

 **North Star Metric**
% of users who complete a gift decision within 5 minutes of opening the app
Target (90 days): **›45%**

Metric	Target	Type
Complete context input	› 75%	Leading
Reach Decision Killer	› 60%	Leading
Gift decision completion	› 45%	Leading
Returns within 30 days	› 30%	Lagging
NPS score	› 40	Lagging

Try Pitch

Day 1 revenue needs zero infrastructure — just a purchase. Everything after that is a layer on top of a working product.

Risks, Mitigation & What's Next

Top 3 Risks + Mitigations

● Cold Start

No users → no data → no trust

✓ Mitigation: Seed college WhatsApp groups personally. WhatsApp share on Screen 6 pulls friends in automatically.

● AI Trust Gap

Users don't trust AI for emotional calls

✓ Mitigation: Every suggestion uses their own words — "You said she values effort." Feels like their own thinking.

● Low Retention

Used once for a birthday, then forgotten

✓ Mitigation: Recurring festivals. Screen 6 share pulls friends back. V2 saved profiles = zero friction.

Try Pitch

Go-to-Market

💬 College WhatsApp Groups

Zero ad spend. Seed 5-10 groups personally. Target: first 500 users.

Instagram Reels

Gifting anxiety is relatable/shareable content. 2-3 Reels/week. Founder-led.

Product Hunt Launch

List GiftRight on launch day. Gifting + AI = trending niche. Built-in audience of early adopters & product builders.

*The gap is real. The research confirms it.
The product closes it.*

What's Next for GiftRight

NOW

MVP — Live Today

- Core loop working: Context → Curation → Confidence
- Affiliate revenue from Day 1

V2

Narrative Engine + Confidence Pack

- Auto-generated message card ("what to write")
- Saved recipient profiles | ₹99-₹199/mo sub
- Fandom/niche identity tags

V3

Scale

- UPI Group Pooling (1-2% fee)
- B2B Gifting API (Diwali, bulk onboarding)
- SaaS pricing per 1000 queries
